

Viano

Overview

Real freedom is the freedom to make up your own mind.

Viano takes the concept of an extremely flexible MPV and adds class-leading design incorporating many Mercedes-Benz passenger car design and engineering elements. Viano's main characteristics are its styling, interior design, versatility, handling, manoeuvrability and the overall sense of quality. Viano appeals to a broad range of customers from active families to business users on the move.

The Viano's two design and equipment lines, Trend and Ambiente each have their own distinctive personality. The active, family orientated Trend is complimented by the sophisticated luxury of the Ambiente. Each line is available in three vehicle lengths, compact, long and extra long and a choice of engines and transmissions. Add to this a highly flexible interior layout and a host of standard features and optional extras, and you have an extremely versatile MPV, which stands out in its class.

Comfortable and ergonomic seating is relaxing for both driver and passengers. Viano's seat rail system offers flexibility, unmatched in its class – from an additional 6 seats, which are all adult size to a huge load space. Loading is always easy too thanks to smart design and some clever extras.

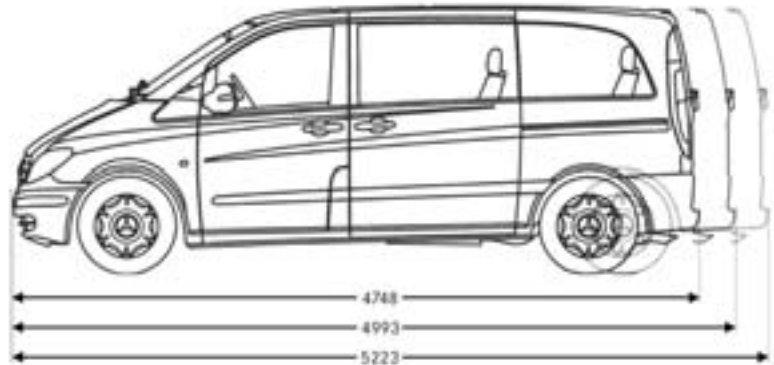

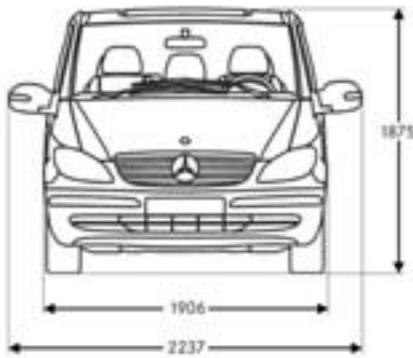

Did you know?

- The Trend and Ambiente are available in three different body lengths, compact (approx. 4.75 m long), long (approx. 4.99m) and extra-long (approx.5.22m).
- The standard front seats with features such as stepless height-adjustment and an inside armrest, can be upgraded to full electric adjustment with memory function and a two-stage seat heater.
- Whatever the seating combination, there's still plenty of room for luggage – From 430 to 970 litres with all the seats to an incredible 3550 litres with the rear seats removed.
- In the Viano, sensors linked to an electronic monitor take account of the type of driving and the load on the engine oil, and a microcomputer then calculates when each service is needed, rather than sticking rigidly to a servicing schedule and can increase the service intervals.
- The standard ESP®, electronic stability programme, uses its own gyroscope to help stabilise the Viano when driving over loose or slippery surfaces such as snow or ice. If risk of skidding arises, ESP® brakes individual wheels and, if necessary, it will reduce the engine's power to bring the vehicle back under control.
- With standard power steering and turning circle of just 11.8 metres (for the compact and long versions) the Viano cuts a fine figure when manoeuvring and parking.
- Two optionally available 3-seater bench seats can be fitted, making it possible to carry up to 8 occupants
- Self-levelling air suspension provides excellent ride comfort, regardless of how laden the vehicle is.
- Loading the Viano is easy thanks to the tailgate's opening angle of more than 90°.

Press

'The Viano brings with it many of the features that made the V-Class stand out, including lots of room and seating options that, uniquely, can include four people sitting face to face. Its leisure ambitions are plain from the options package available: one of them is tailored for cyclists. Inside, expect more car-like ergonomics, with a dash-mounted gear selector, and more luxury equipment.' **What MPV**

Technical Data

Viano Standard Equipment

Trend - selection

ABS (Anti-Lock Braking) and BAS (Brake Assist)
 Adjustable steering column
 ASSYST - service monitor system
 Audio 10 CD radio/CD player
 Central locking with radio remote control
 Driver and front passenger airbag
 Driver authorisation systems with immobiliser
 Electric hinged windows at rear
 Front electric windows
 ESP® with ASR (Anti-Skid Control)
 Exterior rearview mirrors electrically adjustable and heated
 Four single seats in rear on a seat rail system with quick locking
 Halogen fog lamps
 Roof rails
 Air-conditioning
 Sun visors with mirror illumination
 Tailgate with wash/wipe
 Tinted glass - blue
 Twin sliding rear doors
 Foldaway table

Ambiente - selection

(in addition)
